EXPERIENCE

Cyber Agents, Inc., Digital Forensic Examiner, August 2022 – present

Forensic examination, forensic imaging, cell phone extraction, compromised device investigation, intellectual property theft investigation, crypto currency investigation, digital forgery and fraud investigation, digital video recording analysis, trial consultation, intrusion detection analysis.

Participated in the examination and analysis of over 100 computers and mobile devices for cases assigned to Cyber Agents as the primary or secondary examiner using Magnet Axiom, Encase v22.1, Forensic Explorer, Cell Hawk, UFED, Cellebrite Physical Analyzer (Inseyets), Net Analysis v2.10, HstEx v5.2, BTC Tool, and others.

Present and assist presentations related to Digital Forensics, trial strategy, and Forensic Software usage to the Kentucky Department of Public Advocacy (DPA) – including small group presentations to investigators and presented in an online training/webinar for attorneys and investigators, Tennessee Public Defenders, and Kentucky Association of Criminal Defense Lawyers.

Kentucky Department of Public Advocacy, Investigator II, August 2021 – August 2022

Worked with Attorneys and Clients to investigate facts that strengthen each Client's legal defense.
I interviewed witnesses and experts to investigate facts.
Assembled fact-based reports of individual Client cases.
Reviewed digital evidence and physical evidence.

HUB Enterprises, January 2021 – July 2021

Investigated Insurance claims that were flagged for possible fraud.
Conducted Surveillance in austere environments during varying times of day and night.
Assembled reports to various Insurance Providers to present facts that would support a fraudulent claim or would corroborate their Client's claim.

Signum Veri Technologies, August 2019 – January 2021

Penetration testing various network environments, onsite and remote.
Team member of projects that met clients' cybersecurity needs.
Investigated Incidents of Concern (IOC) related to Malware and exploited networks.
Implemented multiple penetration testing tools and software to include:

- Hak5 Hardware: BashBunny, USB Rubber Ducky, and Shark Jack
- Customized Hardware: RasberryPi 4
- Software and Operating Systems: Kali Linux, OWASP ZAP, Metasploit, Nmap, Burp Suite

Kentucky State Police Digital Forensics Lab, Intern, Summer 2019

Responsible for imaging hard drives from computers, receiving evidence, researching various items for examination, validating digital forensic tools using different operating systems, hardware, and software.

US ARMY, 2009 – 2015

Served in various duty positions, including Squad Leader, Assistant Operations Sergeant, and others.
Warrior Leader Course Graduate, Leadership Award Candidate
Air Assault School Graduate
Legionnaire in the Order of St. Maurice Awardee
